

Local Heritage List

January 2020

Introduction

This Local Heritage List is a register of local heritage assets which contribute significantly to Barnet's character and historic identity. It was approved by the Council's Policy and Resources Committee on the 6th January 2020. It supplements the Statutory List of Buildings of Special Architectural or Historic Interest, which is comprised of buildings of national importance. The two lists therefore provide a comprehensive record of the Borough's historic buildings and other structures.

Buildings included on the Statutory List benefit from a statutory protection beyond that of normal planning control. Buildings included on the Local Heritage List do not. However, in exercising planning control, it is the Local Planning Authority's intention to preserve and enhance these historic assets wherever possible.

Heritage assets included on the Local Heritage List have been nominated by a variety of sources, including Historic England, Council Officers, Barnet Councillors, local history and amenity societies, residents' associations and private individuals. A selection panel reviewed the nominations against approved criteria, set out below.

For inclusion on the List, heritage assets must be of architectural or historic interest, or both.

Architectural Interest - Heritage assets which are locally important for the interest of their architectural design, decoration, materials or craftsmanship. These include locally important examples of particular asset types which demonstrate good design qualities, including form, proportions, attention to detail, innovation and articulation. The building or structure should be a well-executed example of a particular architectural style and contribute to local character.

Historical Interest - Heritage assets which illustrate important aspects of Barnet's social, economic, cultural, industrial, religious or military history. These include buildings and other structures which have a close historical association with locally important people, families or events. These assets may be representative of a particular phase of Barnet's history, including those with communal, spiritual, cultural or artistic importance.

General Principles of Selection:

- **Age and rarity:** The older an asset is and the fewer surviving examples of its type, the more likely it is to have local interest. Some selectivity will be required to include only the best examples from the Victorian and Edwardian periods. Assets dating from post 1910 will require even greater selectivity. Only high-quality examples from the inter-war and post-war period will be selected. Assets less than 30 years old will not be considered eligible for inclusion.
- **Aesthetic merits:** The appearance of an asset is an important consideration in the selection process. This includes assets which reflect local traditions of design, craftsmanship and materials. The asset may be highly decorative, or of plain form and detailing, but should have aesthetic appeal. Selection may consider the wider contribution of the building, structure or group to the local townscape.

- **Landmark qualities:** Assets which, due to their scale or siting, stand out positively in their surroundings. They create visual interest and contribute to the local townscape due to their scale and location. Their position might be on a corner plot where they act as a focal point in the streetscene or on a site where they can be seen in longer views.
- **Intactness (state of originality):** A building's architectural and historic interest may have been devalued via cumulative intervention and inappropriate repairs. The more intact and 'complete' a building is the greater likelihood it is to be considered for local listing.
- **Group value:** Certain buildings or structures are part of a larger group of similarly designed buildings or structures, which together create a distinctive local environment. Examples include houses in a terrace, different buildings in an estate designed by the same architect which share common design features, a range of buildings in a similar architectural style, and buildings which use the same palette of locally distinctive materials.
- **Social and communal value:** Buildings or sites which have associations with local social or economic activities, events, traditions, practices or wider history. They are often perceived as a source of local identity, distinctiveness, social interaction or coherence. Such properties may be based on intangible aspects of heritage such as the 'collective memory' of a place. Examples include civic buildings, which are reflective of local pride and distinctiveness.

We update the Local Heritage List every year. The review process starts each April, with an initial assessment of all nominations. If it is considered that a nominated building or structure meets the local listing criteria, formal consultation will be undertaken with the owner/occupier. If you wish to make a nomination, please forward photographic images, a description and any historical information to LocalListNominations@barnet.gov.uk

It is hoped that the Local Heritage List will afford a better appreciation of the quality and importance of Barnet's local heritage assets and stimulate a greater interest in the Borough's historic environment.

The building that stands behind the Finchley War Memorial was erected in 1925 in the then front garden of the building. This memorial was unveiled by Viscount Lascelles in November 1925. The new information is that this memorial was not the original memorial to Finchley's losses in the Great War (Finchley sent over 5,000 men to the forces and one out of every five never returned). Finchley's original war memorial was in fact this building, known as "St Kilda's". At a "Town Meeting" held in May 1919 it was	Approved	Landmark Qualities, Intactness, Social and Communal Value	Historical Interest

			<p>resolved that the Finchley war memorial should take the form of a club or institute for ex-servicemen, in preference to a formal monument or an extension to the Finchley Cottage Hospital (although in the vent these too were subsequently established (see above as to the monument, whilst the extension to the cottage hospital was opened in 1922 (when the hospital was renamed Finchley memorial Hospital).</p> <p>St Kilda's was acquired as the original memorial by the Trustees of the Finchley United Services Club in September 1921 with the aid of public subscriptions and support from the United Services Fund (the successor to the Army Canteen Fund, which held surplus funds from wartime military canteens). A 1921 Trust Deed records that the Fund provided £1,400 towards the project and that one of the objects of the club was "to raise the standard of citizenship both from a social and educational standpoint."</p>

72.	HT00049	Nos. 1 and 2 Blenheim Road, EN5 4NF	A pair of three-storey semi-detached dwellings, in the garden suburb style pioneered by Norman Shaw. Built in red brick with moulded and carved panels, prominent gables, and octagonal towers with spires at road junctions. Several ornate wooden porches and stained-glass doorways survive. This pair of semi-detached houses effectively terminates the vista west along Ravenscroft Park. Raised ground floors above semi-basements, full-width arched 1st-floor windows and extravagant black and white half-timbered gables give them the extra height and scale needed to be read from a distance. Closer up, they display a wealth of ornamental detail including carved brick, terracotta corbels, turned wooden porch posts and balcony balustrades, stained glass in front doors and spiralling glazing bar patterns (though some upper-floor bars have been lost). 105.	HT01126	New Southgate Cemetery Gatepiers, Brunswick Park Road, N11 1JJ	This pair of tall, prominent and highly decorative stone gatepiers in Brunswick Park Road, N11 are in a Landmark position - signalling the entrance to New Southgate Cemetery and Crematorium (previously the Great Northern Cemetery). Their design reflects details of the Cemetery's 1861 chapel, and they are likely to be the 1860-61 work of the same architect, Edmund Alexander Spurr, F.R.I.B.A. (1813-72). An identical second pair stood originally on the opposite side of the road, at the entrance to the western section of the cemetery. But they were moved twice when parts of the western section were successively sold for development and are now in a prominent position close to the 1861 chapel, at the entrance to the Baha'i part of the cemetery. As is the case with the chapel, both pairs of gatepiers have Early English (or English Gothic) type features - although, naturally, on a smaller scale and fewer than the chapel's. The tall, open stone lanterns at the top of each pier have typical Early English-style clusters of slender columns framing typical lancet-shaped tall thin openings. Reaching half-way up the piers are vertical buttresses, a reasonable support for this style and topped with outward-facing	Approved	Landmark Qualities, Aesthetic Merits	Architectural Interest, Historical Interest

			Gothic-type gables. Small gargoyle-like creatures reach out from the stone lanterns, but not as medieval-style water-spouts; they are purely decorative.			
106.	HT01127	Grave of Shoghi Effendi, Brunswick Park Road, N11 1JJ	The column built over Shoghi Effendi's grave has a Corinthian capitol, is approximately 4 metres in height, and is made from the same white marble Effendi had chosen for the resting places of members of his family in Haifa. The column is surmounted by a globe, the outline of Africa facing forward to symbolize the high regard that Effendi had for the continent and the spirituality of its peoples. Atop the globe sits a large gilded bronze eagle, a reproduction of a Japanese sculpture which Effendi had placed in his own room and admired for its realism and beauty. The column is approached through a garden approximately 11 metres in width and 19 metres in length surrounded by a low brick wall. The column is set within a paved area enclosed within a low stone balustrade wall, approximately 11 metres in width and 11 metres in length. 107.	HT01125	New Southgate Cemetery Chapel and Crematorium, Brunswick Park Road, N11 1JJ	The Chapel, constructed in brick and dressed stone, has been described in both the 1860s and later as unusually large for a cemetery chapel, "impressive", and "one of London's finest cemetery chapels". It is sited at the centre and highest point of New Southgate Cemetery and Crematorium (previously Great Northern Cemetery), was consecrated in July 1861 by the Bishop of Rochester as an episcopal chapel (Church of England). Both the Chapel and the cemetery itself (originally 150 acres) were designed by architect Edmund Alexander Spurr, F.R.I.B.A. (1813-72). It is at the centre point for twelve wide gravel paths that radiate outwards "like the spokes of a wheel" (Dawes) to a wide outer perimeter circle. Historically the cemetery and its chapel were built as one of the new large Outer London burial places established by private cemetery companies after the closure of Inner London graveyards in the 1850s. It also has the re-interred remains from City churches destroyed in the 1666 Fire of London.	Approved	Landmark Qualities	Architectural Interest, Historical Interest

			<p>The Chapel's imposing 150-ft. (46m.) broach spire rises steeply from within a lower-pitched pyramid at the top of its tall square tower. Archetypal Early English-style paired, slender, pointed-arch lancet windows on the spire are duplicates of larger lancets, framed and emphasised in stone, at the top and middle levels of the tower, and further emphasised by quatrefoil plate tracery within the pointed arches of the stone surrounds. Typical Early English tall, narrow and prominent vertical buttresses support the tower at its three lower levels. The necessarily wide front entrance into the Chapel combines utility with aesthetic quality. It is set within the centre of a high gabled facade and then a lower wide-gabled entrance porch. High above the entrance door, on the facade, a large group of three stepped lancets is not only framed by slender columns with typical leaf-patterned capitals but also edged with earlier Norman-type carved zig-zag. Below, the wide doorway is classic Early English: a wide, shallow-pointed arch framed by clustered columns with deeply undercut leaf-patterned capitals and deeply-grooved arch moulding above. A slender arched stone hood immediately above this, terminating on each side in undercut and hollowed-out leaf patterning, adds a final touch to this remarkable doorway. Close by, a slender stone turret with lancets and intricate carving, set between the church's tall, lanceted brick tower and the gabled brick entrance facade, emphasises again the delicacy and fineness of the Chapel's stonework and the careful detailing that went into the Chapel's design.</p>

Ted Levy Benjamin & Partners, led by the architect Ted Levy (1931-1986), designed a number of developments and one-off houses in north London throughout the 1970s and early '80s which are notable for their clever harnessing of natural light. The practice comprising three South African émigrés came to define contemporary architecture in north London in the 1970s. Ted Levy's ethos was to provide light and space which he achieved by pitching the ceilings in either the principal bedrooms or reception rooms to give them double height.		Aesthetic Merits	
120.	HT01047	Nos.1 - 10 Central Circus, NW4 3JS	North-west and South-east quadrants of Hendon Central Circus, on either side of Vivian Avenue fronting Hendon Way. Almost opposite Hendon Town Hall, it contributes dramatically to this townscape because of its scale, location, visibility and contrasting architectural style. The architects, Herbert A. Welch and Felix J. Lander, had recently won the London Architecture Bronze Medal. The plans for their new Methodist church confirm that its structure is typical Modernist concrete and steel with rectangular emphasis. Exterior facing bricks are in purple and brown tones. The interior, filled with light, has plain high walls, tall rectangular and also high clerestory windows, and tall Modernist curtain-wall effects. High on the East wall is a stained glass window by Christopher Webb, "The Risen Christ and the Work of Women".		Value, Landmark Qualities, Aesthetic Merits

133.	HT00094	The Greyhound PH, No. 50 Church End, NW4 4JT	The Greyhound Inn stands on the former site of the Church House built 1676, where parish meetings took place. From the outset, the building had an alcohol licence and it was used for vestry meetings until 1878 after which it simply served as a pub. The name and a plaque inside the pub commemorates the first greyhound race meeting in England, which occurred in Hendon in 1876, although it did not catch on in Britain as a popular spectator sport until 1926. The Greyhound Inn however has been known as such since at least 1794, although the original weatherboarded building was replaced by the current structure in 1896. The inn, which is still owned by a trust of St Mary's, has the church's Commandment boards hanging in one of the bars. 143.	HT00102	The Hyde Institute (Formerly No. 2 The Old Library), Church Passage, EN5 4QS	Designed in 1903-4 by Thomas Graham Jackson, famous for his work in Oxford & Cambridge. Originally "Literary Institute and Reading Rooms" bequeathed in 1888 by Julia Hyde in memory of her late husband, Henry, it became Barnet public library, and is now art and design studios for Barnet & Southgate College. The entrance passage originally gave access to a double-height reading room with an open timber roof and galleries; a floor has since been inserted with offices, etc. Behind is a generous top-lit extension for meetings, lectures and/or practical classes. It has a Free Classical façade, with a pitched roof behind its parapet balustrade and traces of a former lantern or ventilator. The façade is unified by a subtle grid. It is dominated by two pairs of six-light windows of stone, derived from Hardwick and other Elizabethan halls. Through them can be seen the original gallery balustrade. They are framed by Ionic pilasters, their lower third solid and upper two-thirds fluted in Mannerist style, which stand on a plinth and support a dentil course. These are mainly in red brick, expertly carved. Across them, continuing the transom lines, run two stone courses, tying in the central commemorative plaque and the oval window above the entrance arch. 			<p>Soutar's most accomplished design on the Suburb in his refined Early Georgian manner, informed by the Unwin and Lutyens houses of the pre-war period and illustrating his interest in Artisan Mannerism and provincial Georgian prototypes. It is a lavish house for a wealthy and demanding client. The high quality finishes and detailing and the unusual plan mark the house apart from much of Soutar's output, where he was building groups of speculative houses for the market. The breadth of the double plot provides space for the accommodation of the service wing, with garages to house the two cars demanded by a successful businessman by this date. The house is built of purple/brown brick with red brick dressings and a step tiled roof with eaves cornice and two large asymmetrically placed chimneys. Dormers have leaded casements and segmental heads. It is two storeys plus attic and has an 'H' plan with recessed centre and projecting hipped flanking wings. Recessed angle pilasters form the corners and a giant order of pilasters rise through the central core with capitals formed of brick and tile. Windows are cruciform leaded casements to the ground floor and two-light casements to the first floor, the central ones with segmental heads. Ground floor window heads are protected by projecting brick and tile hood moulds. The front elevation is a complex study of early English provincial classicism. Seemingly symmetrical in form at first glance, the house is wilfully asymmetric and eccentric in detail.</p>

253.	HT00978	Hendon Baptist Church, Finchley Lane, NW4 1DJ	Erected in 1886, designed by the architect J.E. Sears as an individualistic version of a 13th century Gothic Church. Designed to seat 600 it is a ailed cruciformed building, with a crypt which serves as a church hall. Constructed from stone it includes bar-tracery rose windows incorporated into larger gothic arched windows. Built in light rubble stone it includes many gothic references including a central turret and two decorative spire / towers with stone crosses at the top with a grey slate roof. 254.	HT00178	Nos. 1 and 2 Finchley Villas (No. 2 is 2A and 2B) Finchley Park, N12 9JT	A large, striking two-storey semi-detached property that appears on the 1863-5 Middlesex Ordinance Survey map. Its wide-gabled facade in original yellow brick has flights of steps leading up to the two raised entrance doors with their semi-circular fanlights. The contrasting prominent red-brick detail includes an array of window heads in straight, round-arched, cambered and lancet shapes. 255.	HT00979	Nos. 18 - 20 Finchley Park, N12 9JN	18-20 Finchley Park are among a group of houses built in attractive and distinctive designs in the mid- to late-19th century in this side-road (originally "Finsbury Road") off the Great North Road. This pair, nos. 18 & 20, in original brick with sash windows and straight window heads, and in the same workmen's cottage style as the 22-30 group, have retained more original features than some in the larger group. Because of the narrowness of their two plots and the dividing space between them and 22-30, one of this pair has a side entrance door. No. 18's front entrance on the facade has a rectangular straight-headed entrance leading into a porch and then front door. The low pitched roof has a central dividing ridge and shared chimney with chimney pots.	Approved	Intactness, Aesthetic Merits, Group Value	Architectural Interest

256.	HT00181	Nos. 22 - 30 Finchley Park, N12 9JN	This plain terrace of five two-storey houses in original brick was built in simple "economic Georgian" style. The flat facades have appropriate round-arched entrances, most of which have retained their inset porches. Most of the windows remain sash-type, but a ground-floor angled bay window with a half-hipped roof has been added to one of them. Front doors are in a variety of styles. These are among a group of houses built in attractive and distinctive designs in the mid- to late-19th century in this side-road (originally "Finsbury Road") off the Great North Road. 257.	HT00179	No. 35 Finchley Park, N12 9JS	This is among a group of houses built in attractive and distinctive designs in the mid- to late-19th century (or 20th century) in this side-road (originally "Finsbury Road") off the Great North Road. This unusual red-brick single-storey cottage-type design has a higher storey visible at the rear. An 1896 Directory showed this site as occupied by the "London Co-operative Society Ltd (stables)". The unusual shape and features of Lime Cottage may well be based on an original well-designed set of stables (or, indeed, on the features of a small village school). A central ground-floor entrance is flanked on the west by a north-facing ground-floor gable and on the east by an east-facing second gable. The central round-arched front door is adjoined, on its east, by two large casement windows with semi-circular fanlights. Red-brick piers between door and windows and rising into the red-brick arched surrounds give the impression that door and windows are inset into the wall. White brackets below the ground-floor roof line and prominent decorative bargeboards on both ground-floor gables emphasise further the unusual shape of this house. Behind the ground-floor storey, high gable-ends draw attention to the higher storey at the rear. Large windows in the gables have prominent red-brick window heads. A square bay below the larger gable has a half-hipped roof supported by white brackets, larger carved white brackets support the two gables, and there are further distinctive brackets at the roof line. Other decorative elements include window heads in contrasting red brick (two cambered, one a broad lancet-type) above the modern-style.			
259.	HT00180	The Croft (Nos. 44-50 consecutive), Finchley Park, N12 9JL	The Croft is a terraced group of four two-storey double-fronted cottages in vernacular style. The two central cottages have, between them, four picturesque, narrow, forward-facing gables set into a continuous pitched roof. This central pair of cottages is flanked on either side by an end cottage with a much wider gabled facade. Within each of these six gables is a tall pair of first-floor windows. Tall chimneys with numerous chimney pots continue this striking period style. These are among a group of houses built in attractive and distinctive designs in the mid- to late-19th century in this side-road (originally "Finsbury Road") off the Great North Road. 260.	HT00981	Nos. 78 and 80 Finchley Park, N12 9JL	78 and 80 Finchley Park are among a group of houses built in attractive and distinctive designs in the mid- to late-19th century. This pair of semi-detached houses is in simple Georgian style. The large ground-floor triple sash windows of each house, with dramatic stone surrounds and half-hipped, are set against a plain flat facade of original brick, with a slender column with capital set between each sash window. The first-floor triple sashes, slightly smaller, also have prominent surrounds. The entrance doors are at the sides - out of keeping for the style, but necessary because of the narrowness of the two single plots on which the pair are built. A shared single chimney stack rises from the hipped roof. This pair appear to be in a good state of intactness.	Approved	Aesthetic Merits, Group Value, Intactness	Architectural Interest

261.	HT00982	Nos. 82 and 84 Finchley Park, N12 9JL	82-92 Finchley Villas. are among a group of houses built in attractive and distinctive designs in the mid- to late-19th century. This is a group of three pairs of tall, striking white or pale cream semi-detached houses with rough-cast gabled facades and side entrances on narrow plots. They vary in some of their details, and their degrees of intactness differ. Each of 82 and 84, in pale cream, has a large, dominant, angled bay window on both ground and first floors, with prominent half-hips over their first-floor bays. Within each semi-detached half of the gable is a small, plain second-floor window, and decorative brick emphasises dramatically both the steep roof-line and the first-floor half-hip roof-line. All windows are sash, with cambered heads. This pair appears to be in a good state of intactness.	Approved	Aesthetic Merits, Intactness	Architectural Interest
262.	HT00983	No. 94 Finchley Park, N12 9JL	94 Finchley Park is among a group of houses built in attractive and distinctive designs in the mid- to late-19th century. This single detached house on a narrow plot has a great deal of careful detail and a high level of original intactness. The gabled facade, in light original brick, has contrasting red brick quoins all the way up from the ground to the eaves, and these colour contrasts in brick are continued at three levels across the facade. Red-brick string courses link horizontally to the quoins the first-floor red-brick cambered window heads and keystones, the first-floor white window-sills, and the large, central, ground-floor angled and half-hipped bay window. There are decorative white bargeboards, and a small oriel window on the west side supported by brackets. A well-designed narrow, glazed 1.5-storey modern extension, with new entrance door, is attached to the original stock-brick east side of the house. 266.	HT00986	Ashbourne Parade, Nos. 1 - 12 Finchley Road, NW11 0AD	(Former American Golf Shop on ground floor) What marks out the Temple Fortune section of the Finchley Road are the three parades of shops with dark brick flats above - all probably dating from the mid-20th century. This is the most attractive and largest of the three. Built of a dark brick, with Georgian effect windows - very few of which are now original. There are two stories of flats; the central section has a high pitched roof, the "wings" on either side have a lower pitched roof disguised by a low parapet. The central section has a pediment with an attractive cornice on either side.	Approved	Aesthetic Merits, Intactness, Landmark Qualities, Social and Communal Value	Architectural Interest

280.	HT00993	Friary House, Friary Park, Friary Road, N20 0NR	Friary House was built as a family home in 1871 in the present Friary Park. A large house was first built on this site more than 450 years ago, in the 1550s, when the manorial landowners, St. Paul's Cathedral, ordered that "one Convenient Mansion" be built here. The present 1871 brick house was built by Edmund Richardson, company secretary of the Planet Building Society, who had bought some of the land once owned by St. Paul's. The position of the house is significant - aligned carefully with the nearby parish church of St. James, so that anyone standing on the entrance steps of the house can see the spire of the parish church directly down the long, tree-lined drive and across Friary Road. But there is also an additional and very unusual architectural alignment. Richardson (who became a parish churchwarden) included in the house a tall, broad-based spire that is very similar in appearance to the church's spire. Standing in the Friary House drive, one can look north to see the church's spire, and south to see the house's spire. Another notable feature, is the number of its Victorian Gothic-style gables. The largest and most decorative pair, on the north-facade house frontage facing down the drive, has patterned red-brick stilted arches within each gable; among other noteworthy elements on the frontage are stone-framed tall ground-floor canted bay windows, a central entrance framed by large square piers with capitals, and other red-brick and stone detail. The south facade has a large and a small gable, with canted bays below the larger gable. The east facade has a large and a small gable. The west facade (acting as the "rear" of the building) has a tall chimney against its capital-decorated gable-end. 286.	HT00192	Nos. 266-270 (even) Friern Barnet Lane, N20 0NH	This terrace of three two-storey cottages has a datestone of 1865. In original dark brick, the cottages have string courses in contrasting red brick and other contrasting brick patterning. Windows are set within three original roof gables that have carved ornamental barge boards. Entrance doors are round arched, two at the front and one at the side, with projecting porches, which again are decorated with carved white barge boards. All of the cottages are in a good state of originality and intactness.	Approved	Intactness, Group Value, Aesthetic Merits	Architectural Interest
287.	HT00194	Friern House, Friern Barnet Lane, N20 0LS	This two-storey house was built in an early Victorian classical style and is shown on the 1863-5 Ordnance Survey map. Its wide frontage faces the road, and has a curved carriage drive with separate entrance and exit with original front boundary wall, copings and brick gate posts. A central stone porch with square pillars supports a dentilated entablature with blocking course above, protecting a slightly recessed front door with a semi-circular fanlight. The plain yellow-brick facade has a tripartite ground-floor sash window on each side of the central entrance, with moulded surrounds and a dentilated entablature above. Three smaller two-over-two pane first-floor sash windows. The slate roof is low-pitched and hipped.	Approved	Intactness, Aesthetic Merits	Architectural Interest

			survivors derives from a significant mid-Victorian venture: to enable more people, and particularly "the working man", to buy land cheaply and, through their ownership of land, to have the right to vote in Parliamentary elections. Established in 1851 to pursue these "political" and "commercial" aims, the Association was one of the very earliest freehold land societies to be set up in the south after the virtual collapse in 1848 of the national Chartist movement. By 1852 the Association had bought farming fields in present-day North Finchley and divided them into the plots that became Friern Park and its side-roads (including Torrington Grove and Grove Road).			
296.	HT01003	Nos. 66 and 68 Friern Park, N12 9LA	Built 1860, nos. 66 & 68 Friern Park are Late Georgian-style plain, tall and thin three-storey houses that conform closely to the principles of the style. Their plain flat brick facades have a hierarchy of symmetrically arranged sash windows, and semi-circular arched entrances in recessed porches have semi-circle fanlights above the front doors. Windows at the front have straight heads in contrasting brick, and at the rear are set into cambered arches. A string course in contrasting brick runs across the facades of both houses, with the porch arches resting visually on it. The high walls terminate on all sides in a simple projecting three-course brick cornice in contrasting brick - an economical but also classical-style approach to the roof-line in place of a parapet. Most original sash windows remain in 66, together with some original internal cornicing and internal shutters with their surrounding panelling. 			common architectural response to the freehold land society's narrow plots. The windows on both floors are separated by red brick piers and classical capitals, with contrasting vernacular gables and carved white bargeboards above . The 1904 solution to lack of door-space at the front - an entrance and porch at the side for each house - remains here. Having retained its original state and variety of decorative detail, 91 provides evidence also of the lost house. 298.	HT01006	No. 107 Friern Park, N12 9LH	Built 1877-80, 107 Friern Park was designed as a classically-styled two-storey detached villa on five of the freehold land society's plots. Harmonious proportions include the symmetrical alignment of ground and first-floor windows and central portico, but with emphasis on the ground floor's large sash windows surmounted by very large semi-circular Italianate arches in contrasting brick. The facade's centre-piece is its projecting stone portico with inset delicate stone tracery. Supporting the portico are slender classical columns with capitals, and carved into the stone portico above the columns are roundels - an archetypal Italian Renaissance feature. The overhanging low-pitched roof , with carved brackets under the eaves, is also Italianate. The only non-classical elements in this masterly facade are the three skyward-pointing Gothic-type details of the portico - a reminder, perhaps, from the villa's first owner that he was for many years the organist at nearby Christ Church, North Finchley. Despite conversion to flats, this impressive exterior remains intact. 301.	HT01009	No. 128 Friern Park, N12 9LN	Built 1863, 128 Friern Park was designed as a detached rural villa in large grounds, and retains its original classical features. It has a harmonious and symmetrical flat façade with horizontal emphasis. The large wide ground and first floor windows align with each other, with the ground floor pair appropriately larger. The central porch aligns with the central first-floor window and with prominent brackets under the eaves. The visually dominant front windows have striking, shallow cambered arches, further emphasised by wide projecting surrounds in white stucco with central keystones. The prominent central porch is framed by a pair of pilasters on which rests the flat, weighty, rectangular entablature. This 1860s white-stuccoed house with its intact original classical design remains a noticeable feature in the road. 302.	HT01010	Nos. 147, 149, 151 and 153 Friern Park, N12 9LR	Built 1865-70, Nos. 147, 149, 151 & 153 Friern Park is a striking group of four tall (three-storey) terraced houses in a prominent position at the junction of Friern Park and Torrington Grove. These houses have retained all of their extensive brick facade and also the brick of the two-storey Victorian rear extensions. The facade has four two-storey bays, capped with shallow roofs and with brick piers separating each bay window. The group conforms carefully with styles of its period. Georgian-style features include semi-circular arches in contrasting brick above the four porch entrances, semi-circular fanlights above the recessed front doors, and straight window-heads in contrasting brick above the ground and first floor windows. Window hierarchy is observed on the top floor, where they are smaller. Externally this group retains almost entirely its original state. 321.	HT01022	No. 30 Granville Road, EN5 4DS	Two storey modern house with flat roof. Designed in 1958 and completed in 1960 by Fred Hobart, then an Associate with the prominent firm of Trehearne and Norman, Preston & Partners, it sits neatly between older villas. The ground floor is of dark red brick common in the area. In contrast, the first floor floats over it on cantilevers to front and sides, its lightness emphasised by a naturally pale-coloured corrugated aluminium boarding. The flat-roofed volume has a bold three dimensional clarity that is enriched on its street façade by two asymmetrically-placed steel-framed windows: one a plain rectangle punched into the cladding, the other combined with a plywood panel above and mosaic panel below forming a full-height break in the cladding to mark the front door below. Its historical value is enhanced by being largely self-built by the architect and his father in a style pioneered by Le Corbusier but only popularised in Britain by the 1951 Festival of Britain, and by its remarkably intact interior finishes and furnishings. 333.	HT01005	Nos. 96 and 98 Grove Road, N12 9EA	Built 1862, with a datestone high on the facade, 96 & 98 Grove Road are an outstandingly original response to the restrictions of the freehold road's long but narrow plots. A dramatic forward-facing gable creates a wide, shared facade for this semi-detached pair, and intricately carved white bargeboards at the roof line emphasise the height and width of the facade. The front and sides of the building are in original light brick English Bond, with red brick details creating attractive colour contrasts. A narrow red brick string course runs at mid-height around the building, further emphasising width, as do red brick quoins at the corners, from ground to eaves. Sash windows have attractive red brick patterning on their straight heads and sides. The "front" doors at the sides gave wider access, as well, to the long rear Victorian gardens, and some other owners of the freehold road's narrow plots also chose this entrance solution. But this shared-gable variation is particularly unusual. 337.	HT00225	The Pound, Hadley Common	One of a number of timber pounds (or pinfolds) and strayfields situated on the Chase at the time of its enclosure. These were places where stray livestock were kept in a dedicated enclosure until claimed by their owners or sold to cover the costs of impounding. The Pound, was last repaired thanks to the generosity of Spike Milligan, who lived in nearby Monkenhurst.	Approved	Age and Rarity	Historical Interest
338.	HT00218	The Rectory, Rectory Close, Hadley Common, EN5 5QD	The Rectory is two storey building of red brick with leaded light fenestration. It was built in 1824 with an East facing front with Tudor dripstones. Later additions in 1846 by Street were in a more solid domestic Gothic and were his first secular work designed at the same time as he was restoring the interior of the nearby parish church of St Mary the Virgin. The original Rectory (architect unknown) was built for the incumbent of St Mary the Virgin, Hadley, in 1824. In 1846 it was extended to the west in red brick with stone dressings and clay tiled roofs, with a Gothic pointed front door, windows and an elaborate ground-floor bay. It was extended later in milder Gothic style by another architect.	Approved	Intactness, Landmark Qualities, Aesthetic Merits	Architectural Interest

			Street designed the Rectory extension while working for another great Victorian architect, George Gilbert Scott - possibly on the latter's nearby Christ Church. The following year he got the commission to restore the Church of St Mary the Virgin, and left Scott's employment in 1849. The Rectory and Church are among the first commissions of his independent practice, and already display the exceptional understanding of the Gothic style that was to become a hallmark of his later reputation. 340.	HT00219	Barn at Rectory Close, Hadley Common, EN5 5QD	The barn attached to The Rectory on Hadley Green Road is a weather-board construction with a wooden hayloft door in a red clay tiled hipped roof. The Rectory was built in 1824 with additions in 1846, so the barn is probably contemporaneous.	Approved	Age and Rarity, Aesthetic Merits	Architectural Interest
341.	HT00220	No. 4 Hadley Hurst Cottages, Hadley Common, EN5 5QF	Hadley Hurst Cottages (1-3) were built as stables to the 18th century Hadley Hurst and are statutorily listed. Number 4 lies to the rear of these and has a different built character, comprising a two storey core in brown stock brick and a slate roof with several later single storey extensions in red brick. Has group value with the other three properties which are red brick with hipped tile roofs.	Approved	Intactness, Group Value, Aesthetic Merits	Architectural Interest

342.	HT01025	Church House, Camlet Way, EN5 5PZ	This is a two storey red brick building with sash windows and a red tiled roof. Four windows wide, with main elevations in red brick with a hipped tiled roof, other elevations rendered. There are two single storey side extensions and it has an altered interior. Largely hidden from view, Church House is the church hall of St Mary the Virgin Church, Monken Hadley and as such serves as the premises for many local activities including Girl Guides and many church-based organisation. It stands behind the Grade II* listed parish church and its graveyard and forms a group with the church, The Rectory and the Pagitt's Almshouses. Formerly stables, now parish rooms. Converted from a stable to a house for priests, refugees from the French Revolution, at the end of the 18th century and used since 1910 as parish rooms for Monken Hadley parish. 348.	HT01031	Nos. 1 and 2 Clyde Villas, Hadley Green Road, EN5 5PP	1 and 2 Clyde Villas are two semi-detached Victorian villas with basements built in 1871. Number 3 Clyde Villas is a modern addition but built in the style of Numbers 1 and 2. It is believed the two villas were built by Julia Hyde, owner of the Manor House which became derelict and was demolished in the 1930s to make way for the entrance to King George's Fields. The villas are white rendered brick with a grey slate gabled roof with two gable ends fronting Hadley Green Road which have decorative edging. The central chimney serving both villas has been retained. Both villas have retained the sash windows.	Approved	Intactness, Aesthetic Merits	Architectural Interest
349.	HT01030	Chalkidons, Hadley Green Road, EN5 5PR	Detached Georgian villa with hipped roof made with traditional plain clay tiles and two substantial brick detailed chimneys. The building includes over-hanging eaves, rendered exterior and recessed timber sash windows. The front entrance has a detailed classical stone pediment and columns with 'Chalkidons' inscribed above the front door in place of a fan light. The front door is a solid wood panel stained door. 358.	HT00224	The Hadley Hotel, No. 113 Hadley Road, EN5 5QN	The Hadley Hotel is a largely unaltered imposing three-storey yellow stock brick-built pub with a portico entrance. Sash windows have been retained on the ground floor. Replacement windows on the first and second floors are in keeping with the rest of the building. Slightly paler bricks on the corners and edges of bays give the appearance of stone quoins. Three large chimneys top the low-pitched slate roof. Standing on the corner of Hadley Road and Tudor Road it has landmark qualities.	Approved	Aesthetic Merits, Social and Communal Value, Landmark Qualities, Intactness	Architectural Interest
359.	HT01040	Edgware Library, Hale Lane, HA8 8NN	Architectural historians Bridget Cherry and Nikolaus Pevsner describe Edgware Library as a “pleasant L-shaped building with shallow copper roofs and a dominant glazed gable end, light interiors with large windows in a welcoming manner favoured by post war libraries.” The library is pleasingly set back from the road to allow an area of greenery at the front. The library has a wide selection of books as well as a reference library in a gallery above the main library. It frequently hosts both students revising for exams and the retired reading the day’s newspapers. The library host a large variety of community services such as IT taster sessions for absolute beginners and a conversation café to help new English speakers. There is also “Baby Rhyme Time” and “Toddler Read and Rhyme” for young children as well as Edgware Reading group, Age UK coffee mornings and various other education charities thus every part of the community can be helped there. It also serves the community by hosting councillor surgeries. Up until the Second World War Edgware had no branch library, until in 1945 it was provided with a mobile one. In 1952 services were upgraded with a pre-fabricated building being constructed but this too proved inadequate to demand. The current Edgware Library in Hale Lane was built in 1961 by Hendon Borough Council and was designed by B Bancroft, Chief Assistant	Approved	Social and Communal Value, Intactness, Landmark Qualities	Architectural Interest

416.	HT01041	Mill Hill Library, Hartley Avenue, NW7 2HX	Mill Hill Library is a single storey Neo-Georgian building in red brick with stone portico and slate roof. The building serves the community in myriad ways. It was built in 1937 and was designed by architects A O Knight & Arthur Smith, who also designed Golders Green library. As well as serving as a traditional library with pleasant original book stacks, the library is also host to the NW7 Hub which provides a centre for the community and has events and activities like art classes, a music club, coffee mornings, meditation classes and much else. 417.	HT01280	Mill Hill Fire Station, No. 15 Hartley Avenue, NW7 2HX	"Built in 1929, the Fire Station is of two storeys with pitched roof and distinctive tower. Mill Hill has had a separate fire station since 1899 with the current one in Hartley Avenue having been built in 1929 in a similar style to the Library but just a touch less traditional. It retains its original brick boundary treatment including brick piers with stone copings and iron railings. It provides vital protection for the local community and has played a crucial role during fires on the M1. "	Approved	Landmark Qualities, Social and Communal Value, Intactness	Architectural Interest
418.	HT00050	Nos. 1-27 Carmel Gate (Former Carmelite Monastery), Havanna Drive, NW11 9BB	The Carmelite Monastery at Golders Green was founded in 1908. It was designed by D. Powell of the architectural practice Sinnott, Sinnott and Powell, in the Gothic Revival style. It is of two storeys plus attic and built in yellow stock brick with red brick and stone dressings, with a slate roof. The external doors are solid, plank style and painted dark green. The frontage of the monastery is set well back from Bridge Lane, behind a tall, yellow stock brick	Approved	Landmark Qualities, Social and Communal Value, Intactness, Age and	Historical Interest, Architectural Interest

		<p>boundary wall with iron gates. Close to the main entrance is a two-storey, detached house also in stock brick with a slate roof. A tall, brick wall with substantial buttresses encloses the rear gardens on their western boundary and a close-boarded timber fence runs along the south and eastern boundaries. The secluded nature of the monastery and its gardens combined with its fascinating history and setting. is considered to be an important part of its character. The monastery building provides the dominant historic and unique setting in the conservation area. It consists of four ranges built around a central courtyard and has a bell tower in the south-east corner. Around the courtyard is a stone flagged corridor lit by timber windows with leaded lights, creating an indoor cloister. The north-facing main entrance of the monastery features a tall gable with niche below, which until recently contained a statue of the Virgin Mary and child. The windows on the main façade are of original leaded lights and to the east of the entrance is a projecting turret with stone battlements. The chapel is located to the east of the front entrance and is distinguished by five pairs of lancet windows on the first floor, with contrasting red brick and yellow stone panels above, set within semi-circular arches. The west and south-facing elevations of the domestic part of the building are somewhat plainer with casement windows set at regular intervals on ground and first floors with red brick arches and stone cills. White painted, dormer windows three panes-wide are set within the west and south-facing roofslopes. These historic features combined with the building's pre-eminence in the conservation area and its cohesiveness created by the perimeter wall and landscaping give the area its authentic and pleasing setting and character. The building appears today, much as it was originally intended and despite some uPVC window replacement, the architectural integrity of the building remains intact.</p>		Rarity, Aesthetic Merits

419.	HT00282	Nos. 17 and 19 Heather Walk, HA8 9TS	<p>Detached two storey houses of multi-stock brick with upper floors tile hung and clay tiled roofs with tall distinctive chimney stacks. Houses designed by Ernest George Trobridge (1884 -1942) who built similarly designed homes across North West London the first half of the 20th Century, many of which have been statutory listed. Trobridge drew heavily on the past these buildings have a neo-vernacular style, resembling 16th Century cottages and can be considered the pinnacle of the Tudor Revival movement. The houses have several features which are typical of Trobridge's buildings. One of them is the elm boarding, he believed the inexpensive wood could be used to help alleviate the demand for new housing after the First World War. They also have exaggerated and beautiful roofs and chimneys with the usual imaginative rustic style. Trobridge lived in one of the houses and it features a blue plaque listing Trobridge as an "Architectural Extraordinaire". Trobridge was a man of strong moral conviction and believed that poor people believed to live in beautiful homes just like the rich. The Times of Edgware described his work as "Rural charm with a dash of Swedish mysticism... with their spiralling chimneys, bizarre window arrangements, and in some cases even castle ramparts and arrow slits, they often appear to be the work of a fantasist." Architectural historian, Dr David Brady explains his style and why he used such exaggerated roofs and chimneys: "If you ask a child to draw a home you will get a big roof and a big chimney - even if the child lives in a block of flats. So that's what Trobridge built to try to really make you feel at home. Gavin Stamp in the 2006 edition of the journal Architectural History says of Trobridge: "if the historian seeks originality, in whatever language, then Ernest Trobridge is the unsung genius of twentieth-century neo-Tudor".</p>	Approved	Aesthetic Merits, Intactness	Architectural Interest

481.	HT01080	Queen Elizabeth Girl's School, High Street, EN5 5RR	A collection of original school buildings which have been altered and extended from 1890 to 1909 by John Ladds (1835-1926), who in 1880 had completed a new boys' school for Christ Church nearby. Modest two-storey gable ended red brick building with stone plaque, fronts High Street. Larger two storey terrace of buildings with gable ends and original timber casement windows and slated roof sits within the site. The two-storey classroom building arrays multiple rendered and half-timbered gables above red brick buttressed walls, in the attractive domestic manner of early Norman Shaw (whose Grims Dyke had begun in 1870 not far away, in Harrow) – rather different from the grander, more formal London Board Schools of the same period. Only the Arts and Crafts façade of Ladd's old assembly hall (1909, now gym) registers on the High Street, and its fine trusses can be glimpsed through the windows. The classroom building is visible from Meadway. It is Ladds' complex that is nominated for listing, not the Neo-Georgian extension of 1924-7 by J. W. Fisher or later additions. The two doorways that punctuate the front project as bay-ed entrances. When the publican was Mrs Elizabeth Godfrey, the building was purchased by the Barnet Urban District Council in 1963 with a view to demolishing it to provide an access road to a bypass planned to run parallel to Barnet High Street. The plan never came to fruition hence the building was inherited by the London Borough of Barnet when the boroughs were merged in 1965. It was eventually opened in 1975 as the Old Bull Arts Centre. The buildings at the rear would probably have been stables for the original pub, although they have been modernised. 68 High Street is mentioned in the Wood Street Conservation Area character appraisal statement as making a positive contribution to the character and appearance of the conservation area. 604.	HT01091	St Mary's C of E Primary School, Littlegrove, EN4 8SR	A single and two storey gable ended school building fronting both Church Hill Road and Littlegrove. Of brick with stone mullioned windows, some tiered. The steep roof has prominent gables at each end, and a third, lower, one by the main entrance, all supported on curved brackets. A fourth tiny gable, once probably for ventilation, completes the picturesque effect. The original timber window and gothic entrance door frames have been lost, and a chimney stack has been shortened, but otherwise the building is remarkably intact externally. This elementary school opened in 1872, two years after the game-changing 1870 Education Act requiring schools to be built where existing church or charitable places were insufficient. The original single-storey building, facing Church Hill, is partly screened by a high fence, but combines dignity with a gentle scale appropriate for children. Behind it, along Littlegrove, additions have accumulated in styles characteristic of later periods, but without detracting from the mother building. 619.	HT01106	Nos. 49 - 59 (Odd) Lyonsdown Avenue, EN5 1DX	<p>A striking and attractive sequence of six large detached houses all built before 1913 on the upmarket Lyonsdown estate all in Arts and Crafts inspired style which later dominated suburbs but here is an early example. Each is a unique and individual design but with basically vernacular details of southern England, then being popularised by architects such as C.F.A. Voysey and Raymond Unwin of Hampstead Garden Suburb (first phase 1907-15). No. 49: Detached house in Voysey style with plenty of southern England vernacular details, including catslide roof, battered at the bottom so that the walls spread out, hoods over the ground-floor windows, tall chimneys, pitched roof dormer. No. 51: smaller detached house in render with half-timbering. Wide-spreading clay tile roof with a pretty sequence of dormers, one with bay window and another with chimney stack rising through its gable end. Jettied first floor to front over bay window and integral porch and sloping angle buttresses supporting the jettied corners. No. 53 and 55: semi-detached pair in pebble-dash and half-timbering. Steeply pitched roof rising to a central cluster of chimneys, each one separately expressed, a dramatic feature in the skyline. Jettied first floor over bay windows and corner porches. Eaves to main roof slopes and large dormers with boldly expressed rafter feet. No. 57: detached house in brick with render details, with clay tile roof, featuring interlocking gable ends facing street with porch at the intersection. Asymmetrical fenestration including a double-height window in the right-hand gable lighting the staircase. The chimneys are stepped out at the top representing machicolation. Original front door with round window with multiple glazing bars. No. 59: Built in 1908 (date stamp on leadwork by front door), No. 59 is the biggest and most impressive house of the sequence in brick, some laid in herringbone pattern, with tile hanging and tall, steeply pitched clay tile roofs. Magnificent and varied set of chimney stacks, the tallest is externally expressed and all the way to the ground and has a recessed panel. The chimney stack to the</p>	Approved	Intactness, Aesthetic Merits	Architectural Interest

671.	HT01117	Ayesha Community School, No. 10A Montague Road, NW4 3ES	Former Montague Primary. Built in 1901, this former school comprises a pair of single-storey buildings arranged in an L-shape enclosing a playground facing the street. The playground facades have similarities: both are of stock brick with red brick dressings, red terracotta parapets and mouldings, and clay tiled roofs. Each also has a tall central stepped brick gable, topped with a round arch and finial, and flanked by big dormer windows with plastered gables. But a closer look shows intriguing variations of window shape, size and decoration. The end of the L facing the street repeats the materials and forms of the playground facades, but	Approved	Social and Communal Value, Intactness, Aesthetic Merits	Architectural Interest

			again with variations. The composition fits effortlessly onto a steep site and into its Victorian residential street context, with bold but not overbearing forms and an impressive quantity and quality of Arts & Crafts details. The roof also includes a cupola and, chimneys that have been capped.

800.	HT01146	No. 19 Clovelly Cottage (Flats 1 - 4), Park Road, EN5 5RY	A detached two storey Victorian house which stands out in the road. It is built of pale yellow London stock bricks, with red brick detailing. It has attractive terracotta detailing and a stained glass panel above the front door which can just be identified in the 1895 film negatives so is probably original. The front door is still recessed. Unfortunately the windows are not original. It stood close to the Photographic Works where the owner worked. Formerly Clovelly Cottage, this Victorian building is where Britain's first successful motion picture film (called "Incident at Clovelly Cottage") was produced by Birt Acres and Robert Paul in 1895. The house now looks to be divided into 2 properties but is remarkably unchanged from those times. 803.	HT00573	The Lodge (now called The Cottage), Parson Street, NW4 1QJ	Detached Victorian two storey red brick building with decorative barge boards, finial and tower. Roofed in clay plain tiles. The brick structure includes decorative bracketed eaves, decorative banding with darker bricks and string course. Windows are white painted, timber casement and the entrance is within a white painted timber gothic decorative arched door with ornamental black hinges.	Approved	Landmark Qualities, Intactness, Age and Rarity	Architectural Interest
804.	HT00572	Oak Villas (No. 1 and 2, known as Oak House), Parson Street, NW4 1QJ	Three storey semi detached property known as Oak House includes timber bay projecting windows at first floor and French doors at ground floor directly from the street. Entrances are accessed via stairs with dividing wall in white painted render and metal balustrade. Doorways include rectangular fan light and red brick detailing above. Windows are white painted timber casement with red brick arches and white stone sills. There are two brick course details and decorative cornice. Ground floor is white painted and upper floors yellow buff brick. There is a large flat roof dormer in the roof.	Approved	Intactness, Aesthetic Merits	Architectural Interest
805.	HT00574	The Towers (1-4), Parson Street, NW4 1QU	Formerly known as Ivy Tower (c.1875-1930) Tenterden Tower (1930-1940) The Towers (1940-present). The 3 storey structure is in red brick with lighter brick course detailing at first floor. The windows are white timber frame and the porch is a decorative white timber frame, partially enclosed with wood balustrade detailing. Railings along the crest of the roof and decorative weather vane at the top of the brick and tile tower. Roof is traditional plain clay tiles, with decorative ridge tiles and terracotta finials. Chimneys are brick, decorative and retain their pots. The current property was built in circa 1875 on the footprint of a much older property known as Ivy House. Ivy Cottage, which stands next door, originally formed part of the property. There is a legend that The Towers was once the home of a mistress of the Prince of Wales at the end of the 19th century. 812.	HT01207	Quadrant Close (Flats 1-51), The Burroughs, NW4 3BY	Quadrant Close was built in circa 1930 on the site of an old paper works. This large four storey, C-shaped block of flats possesses splendid art deco features and appears to have changed little since it was constructed. It is a landmark in the area, being on the corner of the A41 and The Burroughs. Constructed from a red brick in English bond, the brick is also used in the lintel details and string course. In this 1930's style the extensive facade is punctuated by elongated stucco entrances with double wooden and glazed art deco doors and curved canted bays. Below the parapet there is a stucco cornice band. Windows, are white glazed units but not original.	Approved	Social and Communal Value, Intactness, Aesthetic Merits	Architectural Interest

822.	HT01153	Nos. 1-15 (Odd) Portland Terrace, Rasper Road, N20 0LU	Terrace of eight Victorian workmen's cottages is two storeys with a shallow pitch roof, punctuated by firebreak walls and chimney stacks. Has a date stone "18FB79" ("9" unclear), indicating the 1870s. Ground floors have rectangular front doors opening onto the pavement. Also at pavement level, first-floor occupants passed through shared round-arched entrances into a passageway where two opposing doors led to each household's stairs and flat. Numerous bootscrapers built into the long wall of the terrace suggest that the expected occupants are likely to have been outdoor workmen such as labourers and gardeners. Beneath the present rendered white exterior of the terrace can be seen the outlines of standard-sized cut stone. Given the original economic level of the terrace, it is likely that these are sturdy "rubble-stone" cottages: a framework of exterior and interior cut stone (ashlar) and an inner filling of random masonry material. Architecturally, the terrace shows evidence of careful design. Straight window-heads in stone on the flat facade can be seen beneath the white render, and the pattern of rectangular front doors and round-arched entrances gives a Georgian hint. Windows on both floors are of equal size, but those on the ground floor gain extra status by having the same prominent keystones as those above the rectangular doors and round-arched entrances. Two households occupied each cottage - one on the ground floor and one upstairs,	Approved	Group Value, Aesthetic Merits, Intactness	Architectural Interest

			but with separate entrances. This interesting terrace illustrates aspects of Barnet's social and economic history.

A landmark building in a neo-Georgian style with hipped roof and pantiled roof. The brick parapet is inlaid with the word Library in white letters. The first floor has white timber sash windows with contrasting brick surrounds. The ground floor windows are arched with fanlights, again with contrasting brick surrounds. The entrance is marked with a stone porch and column detail.	Approved	Intactness, Aesthetic Merits, Social and Communal Value	Architectural Interest
829.	HT01159	Nos. 1 - 33 (Odd) Raydean Road, EN5 1AN	Pairs of two storey houses flanked originally by a garage on one side and by a recessed 1st-floor terrace on the other. The result is a long terrace, but cleverly broken up to give the impression of semi-detached houses. The homes are identical in plan, each pair mirrored and joined to its neighbours. Mainly rendered and painted white, with flat roofs. Nos.1-15 are in the austere geometrical manner of Le Corbusier 10 years earlier, and could almost pass for Dutch or German workers' housing of the period. Perhaps because they didn't sell well, nos.17-33 have added then fashionable Spanish-style pitched-tile copings and porch roofs. These houses were completed in 1935 – the date of the nearby Grade II-listed Odeon cinema at the end of the road – according to modern architectural historian Joshua Abbott. They are one of the few British interwar developments in the International Style, a rare example in Barnet, and in striking contrast to the conventional 'Metroland' semi's opposite. 847.	HT01168	Nos. 17-25 Rosslyn Avenue, EN4 8DH	Two storey, asymmetrical design, built in white painted roughcast render with tile hung front facing gable. Recessed entrance porch, timber casement windows and clay tiled roof. Distinctive arrow head motif to front elevations. This group of six houses, two detached and four semi-detached, were built in 1907, the first to be built in the road. The railway line had been completed in 1860, Oakleigh Park station was nearby and the surrounding population was increasing. Architecturally designed, the houses have many visible external features still intact, resembling Arts & Crafts era. Several roofs appear to be original. The houses were built on a sloping site towards the view of Oak Hill Park. Unusually the garages were built at basement level and accessed via the side and back of the houses. 906.	HT01181	Manorside Primary School, Squires Lane, N3 2AB	A grand building in a quiet residential street of stock brick, with red brick dressings that are richly moulded around each gable segment and frame the windows below them. Its long single-storey renaissance frontage is punctuated rhythmically by slightly projecting bays with round-headed gables. The two hall bays are wider and higher, and the two entrances lower and narrower, than the classroom bays. The street range dates from around 1900. The two halls also have wreaths, and the Infants' and Girls' entrance panels and lettering, of finely carved red brick. The Girls' is embellished sweetly with carved ribbons and flowers. The roofline has a picturesque variety of chimneys, ventilators and cupolas. The only significant alteration to the façade appears to be replacement UPVC windows, but these seem to retain the original glazing proportions. Retains original brick boundary wall, gate piers and gates.	Approved	Social and Communal Value, Intactness, Aesthetic Merits	Architectural Interest

916.	HT01265	High Barnet Underground Station, Station Road, EN5 5RP	A group of single and two storey Victorian buildings in yellow brick with shallow pitch slate roof. Timber sliding sash windows set in wide openings. Tall distinctive chimney stacks in yellow brick with red dressings. High Barnet station was planned by the Edgware, Highgate and London Railway and was originally opened on 1 April 1872. The station buildings are little altered and the station still retains much of its original Victorian architectural character today	Approved	Group Value, Social and Communal Value, Age and Rarity	Architectural Interest, Historical Interest

			with a considerable number of early platform buildings, such as waiting rooms, footbridge and canopy supports. A considerably steep path to the station provides pedestrian access if approaching from the north and a steep approach from the road to station level from the south also remains.			
917.	HT00894	Woodside Park Underground Station and two signal boxes, Station Approach, N12 8SE	Opened 1872 on the Great Northern Railway's Barnet branch. Part of London Underground since c1940. Two storey building in gault brick with shallow pitched slate roof and chimney stacks. Timber sliding sash windows on both ground and first floor façade. Woodside Park station was planned by the Edgware, Highgate and London Railway (EH&LR) and was originally opened as Torrington Park on 1 April 1872 by the Great Northern Railway (which had taken over the EH&LR). The station was on a branch of a line that ran from Finsbury Park to Edgware via Highgate. The station was renamed within a month of opening, and again in 1882., but retaining the historic GNR station design. An original signal box stands just beyond the Barnet end of the down platform. Although no longer used (at least for its original purpose), it is well maintained. The current local list includes two signal boxes, but only one is visible from the station. 918.	HT01184	Edgware Underground Station, Station Road, HA8 7AW	Designed by architect Stanley Heaps the station was opened on the 18th of August 1924 as the terminus of the second phase of the Underground's extension of the Charing Cross, Euston & Hampstead Railway from Golders Green. Architectural historians Bridget Cherry and Nicholas Pevsner described the station as “a unique variant of the classical style [the architect] used for the stations of the Edgware extension”. The station also remarkably still has the beautiful period art deco doors. Edgware Station is a handsome interwar, neo-Georgian designed building. The main brick structure is fronted by a Portland stone colonnade and has had a brick-pavioured driveway created in the forecourt. This forecourt originally featured a landscaped island and was flanked by wings matching the main building. However the eastern and	Approved	Aesthetic Merits, Intactness, Landmark Qualities, Social and Communal Value	Architectural Interest

919.	HT01264	Finchley Central Underground Station, Station Road, N3 2RY	Single storey to main entrance, two storeys to platform. Building in yellow brick with shallow pitch slate roof. Timber sliding sash windows in large openings. Main entrance in semi-circular headed entrance below modest gable. The station, originally named Finchley and Hendon, opened along with the railway to Edgware on 22 August 1867 as part of the line between Finsbury Park and Edgware stations. It has two entrances. The main one, in the original station building, is on the north side of the tracks. The second entrance is to the south of the tracks in Station Road. The station is in a cutting and the two entrances are joined by a footbridge over the tracks from which stairs and lifts connect to the platforms. The station has three platforms. All platforms have original Victorian canopies at their northern ends. The large station car park on the north side of the tracks occupies the site of the former goods yard. 928.	HT01188	No. 54 Orchard House, Station Road, EN5 1QG	54 Station Road is one of the few remaining original Victorian villas, of two storeys in a symmetrical design, left on this road - It is built of yellow stock brick with contrasting red brick quoins and stringcourses. It has a red tiled roof with red decorative ridge tiles. Two tall chimneys remain intact as do the sash windows. The central doorway is set in an impressive red brick doorcase with pilasters and stone detailing above. This was the birth place of Captain Cyril Frisby, who was one of only 3 recipients in Barnet of the Victoria Cross following World War One. 929.	HT01191	Corner House, No. 154 Stonegrove, HA8 8AF	Two storey detached building in multi colour buff brick with clay tile roof. Pair of large semi-circular projecting wings. Original steel windows. The Corner House pub was built in the mid-1930s, designed by Dawe and Carter for brewers Taylor Walker & Co. Basil Oliver in his book "The Renaissance of the English Public House" said The Corner House is a "most ably planned house with large curbed triple windowed ends to the public and saloon bars. Carried up for bedrooms above with rounded roofs over, they certainly add to the attractiveness of the cleverly contrived symmetrical main elevation." Architecture Illustrated magazine featured it in their September 1937 issue. Now used as restaurant. 933.	HT01195	No. 1 Sunset View, EN5 4LB	Asymmetrical two storey detached house in multi-coloured red brick with clay tile roof and side garage. Tall chimney stack on main front elevation rises above single storey bay. Sunset View was laid out in the early 20th century by William Charles Waymouth, who designed most of the houses. They are attractive variations on Arts and Crafts themes, and together comprise – with the landscape of Old Fold Manor Golf Club – an unusually complete and high-quality development for its period. No.1 Sunset View has a classic ‘butterfly’ plan addressing St Albans Road, and is the most prominent. None of its facades are identical, and they display a considerable variety of well-crafted brickwork, door and window details; but it is unified by consistency of materials, an L-shaped pitched roof and tower-like entrance bay acting as a hinge for the two wings. Waymouth was very much a local man. 934.	HT01196	Oriels, No. 16-18 Sunset View, EN5 4LB	Large detached two storey house in multi-coloured red brick with variety of front facing gables. Sunset View was laid out in the early 20th century by William Charles Waymouth, who designed most of the houses. They are attractive variations on Arts and Crafts themes, and together comprise – together with the landscape of Old Fold Manor Golf Club – an unusually complete and high-quality development for its period. Oriels is one of the best houses in Sunset View, and distinguished by having been Waymouth's own home. The street façade is pleasantly picturesque, with asymmetrical entrance (and probably later porch), oriel window and gables; but all unified by consistency of materials, pitched roof and bold chimney stacks. The left-hand end was added later, but in similar style. Waymouth was very much a local man. 991.	HT01211	Nos. 25-31 The Loning, NW9 6DR	This is a distinctive group of two storey houses designed by Ernest Trobridge probably around the late 1920s. Trobridge (1884-1942) was a visionary architect who specialised in timber-framed houses, all neo-vernacular in appearance. There are a large number of his buildings in Kingsbury and Brent organised an exhibition of his work in 2010. Trobridge was noted for his use of natural building materials, including green elm wood, and winding, spiralling chimneys and haphazard window arrangements are typical of his work. The four detached houses in The Loning share many of the characteristics of his other houses, timber framed with brick infill at ground level and all timber at first floor level. The houses form an identifiable group in a small cul-de-sac.	Approved	Group Value, Aesthetic Merits, Intactness	Historical Interest, Architectural Interest

1013.	HT01217	Nos. 2-4 Torrington Grove, N12 9NA	These are two of the 32 surviving houses built on the 256 long, narrow plots of the 1851 Middlesex Freehold Land Association's plots in Friern Park, N12 and side-roads. This two-storey semi-detached pair appear on the 1863-5 Ordnance Survey map and so must have been built between 1853 and 1865. They are therefore among the earliest houses in the freehold road. No.4 still has the full length of the original freehold plot; no.2 has lost about 30 feet at the end of its original plot. They are of brick (London stock, laid in a variation of Sussex Bond). The facade of no.4 has been substantially altered by a large bay window, but the facade of no.2 is intact, with the original two over one sash windows (the larger three-pane sash downstairs having an intact interior shutter). The window heads are segmental arches in London stock. Both have shallow hipped roofs and they share a common chimney stack. Both have modern side-extensions. 1028.	HT00740	St. Andrews School, Totteridge Village, N20 8NX	Adjoining the village green, the school building, in red brick, was designed by Wallis, Gilbert and Partners, better known for their work on factories. The part-hipped roof is tiled, with three dormers and seven ground floor windows looking out towards Totteridge Lane. Above each of the windows is a fanlight with leaded glass in an Art Nouveau style. Each fanlight depicts a New Testament scene (for instance the Last Supper) with an inscription below. Below these windows a string course, with bricks laid vertically rather than horizontally extends along the entire length of the frontage. The school was founded by the Anglican National Society in 1837 and the first school building was completed in 1840. The present buildings date from 1938 (Cherry and Pevsner) or 1939 (Griffiths), when the school was rebuilt on the same site, with extensions in 1954 and 1959. 1038.	HT00738	(Chalcot) No. 90 Totteridge Village, N20 8AE	A two storey detached house rendered in white. The main slated roof is gabled, with a large angled projecting ground floor bay and three sash windows (of varying sizes) on the upper floor. At the side there is a two-storey extension: a garage on the ground floor and a narrower and lower room on the upper floor which projects beyond the main façade of the house.	Approved	Aesthetic Merits, Intactness	Architectural Interest
1039.	HT00739	(Chapel Cottage) No. 92 Totteridge Village, N20 8AE	No 92 is a single storey red brick structure. The round-arched windows are typical of non-conformist church architecture. The corners of the front façade have quoins in contrasting lighter brick, and this contrast also features in a string course at the top of the façade. Both the east and west end gables have typical non-conformist round windows. The current entrance to the building is at the east end. Originally a chapel for workers on the Puget estate. In 1827 Catherine Puget built a chapel and school on their land. The site, surrounded by its graveyard, could be found until 1991 in Totteridge Lane nearly opposite West Hill Way, but is now being redeveloped. In 1840 her son built Chapel Cottage in the middle of the village as a mission centre for estate workers. Now a private house, it still stands near the present village hall. 1042.	HT01228	Century House (Former Town Hall) No. 29 Union Street, EN5 4HY	Built in 1889, the two storey building located at 29 Union Street was specifically built for use as Chipping Barnet's first town hall prior to the establishment of Barnet Urban-District Council in 1894. Its exterior is in neo-Classical style, inspired by the style of ancient Greece. Its dignified composition has a white stucco façade with Classical pilasters and a pediment that is unexpectedly grand for modest Union Street, and a brick side wall relieved by more white pilasters. The building was a focus of civic pride clearly reflected in its neo-Classical style of architecture, a physical homage to the democratic city states of Ancient Greece. The building remained in use as the town hall until it moved to a new building in Wood Street (now the coroner's Court) in 1915.
